Outlook 2012

Fronsac REIT is looking for acquisitions that will sustain its growth. The Trust's capital and debt structure puts it in a selective position for other potential acquisitions.

Depending on the magnitude of potential acquisitions, the Trust could issue additional equity capital. Fronsac REIT will try to maintain a debt/equity ratio of 40/60.

Fronsac REIT does not foresee any major repairs on its commercial properties as their construction is recent and their present condition is excellent.

Results of operations for the quarter ended June 30, 2012

The net loss for the quarter ended June 30, 2012 was \$(8,833) or \$(0.000) per unit compared to a net income of \$9,579 or \$0.001 per unit for the comparative quarter of 2011. The net loss of this quarter is largely attributable to expenses calculated on the variation of the quoted price of the units. These expenses, in the amount of \$65,500, are non-cash expenses.

For the quarter, the Trust had rental revenues of \$162,259 [2011: \$131,859] composed of fixed monthly rents and royalties based on tenants' sales. For the 2012 quarter, Fronsac REIT had the commercial properties of Mont St-Hilaire, St-Jean-sur-le-Richelieu, Rivière-du-Loup in full operations for the three (3) months and the St-Hubert property for 17 days, whereas in 2011, only the properties of Mont-St-Hilaire and St-Jean-sur-le-Richelieu were in operations and for the full quarter.

Consequently on the original \$2,100,000 mortgage, the maximum interest rate over the next 5 years is 5.01%. On January 26, 2012, a portion of the swap representing a notional amount of \$1,301,470, was cancelled at a price of \$61,000, its fair value at the transaction date. For the quarter ended June 30, 2011, the interest was also paid on two (2) mortgages with a value of \$2,832,843 and long term debts of \$550,000.

Professional fees include sums paid to the accountant for the recording of transactions, to lawyers for the conformity to the TSX Venture Exchange (the «Exchange») rules and \$11,000 [2011: \$9,000] paid to a company owned by an officer for the administration of operations of the Trust. Registration and listing fees include disbursements related to being a company listed on the Exchange.

The net loss of June 30, 2012 includes total losses of \$49,100 [2011: losses of \$11,277] for the increase in fair value of the interest rates swap liability, derivative component of the convertible long-term debt and other components measured at fair value at each reporting date.

Capital structure and liquidity

The real estate business is capital-intensive by nature. The Trust's capital structure is key to financing growth. In the real estate industry, financial leverage is used to enhance rates of return on invested capital. Management believes that Fronsac REIT blend of debt and equity in its capital base provides stability and reduces risks, while generating an acceptable return on investment, taking into account the long-term business strategy of the Trust.

The Trust's debts are composed of three (3) mortgages with financial institutions for a total of \$2,526,176 maturing in 2014, 2017 and 2019, two (2) debentures totalling \$200,000 maturing in 2012, one (1) note payable of \$150,000 maturing in 2014, a balance of sale of \$333,000 maturing in 2014 and a convertible debt with an original value of \$333,000 and shown on the statement of financial position at \$328,649. For the mortgages with the financial institutions, the Trust makes monthly payments close to \$21,000 as it wants to increase liquidity for investment and financing purposes. For the debentures, the note payable and the balance of sale, reimbursement of the principal is scheduled at maturity date. The convertible debt will eventually be settled through the issuance of trust units.

The Trust has sufficient liquidity which will help it to keep a ratio of debt to aggregate assets in a neighbourhood of 40% with future acquisitions. The ratio could be revised, as the Trust anticipates an increase in future interest rates.

Trust units

The Trust is authorized to issue an unlimited number of trust units. During the quarter ended June 30, 2012, the Trust did not issue units. As at June 30, 2012, the total number of units issued and outstanding was 20,514,000 units. During the same quarter, the Trust has granted no unit options and no warrants. As at June 30, 2012, 505,000 unit options and 250,000 warrants were outstanding.
