

Management Discussion & Analysis

Q1 2022

Period ended March 31st, 2022

Form 51-102F1

MANAGEMENT'S DISCUSSION & ANALYSIS

SCOPE OF ANALYSIS

This Management's Discussion and Analysis ("MD&A") of the financial condition and results of operations of Canadian Net Real Estate Investment Trust ("Canadian Net" or the "Trust") is intended to provide readers with an assessment of performance and summarize the results of operations and financial condition for the 3-month period ended March 31, 2022. It should be read in conjunction with the Consolidated Financial Statements for the period ended March 31, 2022 and the Consolidated Financial Statements and MD&A for the period ended March 31, 2021. The financial data contained in this MD&A has been prepared in accordance with International Financial Reporting Standards ("IFRS") and all amounts are in Canadian dollars. You can find all copies of Canadian Net's recent financial reports on Canadian Net's website cnetreit.com and on sedar.com.

Dated May 25, 2022, this MD&A reflects all significant information available as of that date and should be read in conjunction with the Consolidated Financial Statements for the period ended March 31, 2022 and accompanying notes included in this report.

The audit committee reviewed the contents of this MD&A and the Financial Statements and the Trust's Board of Trustees has approved them.

CAUTION REGARDING FORWARD-LOOKING STATEMENTS

Securities laws encourage companies to present forward-looking information to provide investors with a better understanding of the Trust's future prospects and help them make informed decisions. This MD&A contains forward-looking statements about the Trust's objectives, strategies, financial position, results of operations, cash flows and operations, which are based on management's current expectations, estimates and assumptions about the markets in which it operates.

Statements based on management's current expectations contain known and unknown inherent risks and uncertainties. Forward-looking statements may include verbs such as "believe," "anticipate," "estimate," "expect," "intend" and "assess" or related expressions, used in the affirmative and negative forms. These statements represent the Trust's intentions, plans, expectations, or beliefs and are subject to risks, uncertainties and other factors, many of which are beyond the Trust's control. Actual results may vary from expectations. The reader is cautioned not to place undue reliance on any forward-looking statements.

The outbreak of COVID-19 has resulted in the federal and provincial governments enacting numerous measures such as the implementation of a travel ban, self-imposed quarantine periods and social distancing. These measures have caused material disruption to businesses and have resulted in an economic slowdown. These measures have also resulted in material disruptions to global equity and capital markets.

It is not possible to forecast with certainty the duration and full scope of the economic impact of COVID-19 and accordingly certain aspects of the Trust's operations could be affected, including rent collection, occupancy rates, demand for retail space, capitalization rates, and the resulting value of the Trust's properties. The full extent and duration of COVID-19 remain uncertain at this time.

Please note that the forward-looking statements contained in this MD&A describe our expectations as at May 25, 2022.

NON-IFRS FINANCIAL MEASURES

This document contains various non-IFRS financial measures, which are used to explain the financial results of the Trust. The terms explained in this section do not have any standardized IFRS meaning and as such may not be comparable to other issuers.

Funds From Operations (FFO) is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. FFO is an industry term and its calculation is prescribed in publications of the Real Property Association of Canada (REALpac). The REIT does not calculate FFO in accordance with the REALpac publications. FFO as calculated by Canadian Net is exclusive of unit-based compensation, accretion of lease payments and unrealized changes in the fair value of investment properties, financial instruments, deferred income taxes and gains or losses on property dispositions.

The Trust considers FFO a meaningful additional measure as it adjusts for certain non-cash items that do not necessarily provide an appropriate picture of a Trust's recurring performance. It more reliably shows the impact on operations of trends in occupancy levels, rental rates, net property operating income and interest costs compared to profit determined in accordance with IFRS.

FFO is reconciled to net income and comprehensive income, which is the most directly comparable IFRS measure (refer to the *Funds From Operations* section).

FFO per unit is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. Canadian Net calculates FFO per unit as FFO divided by the weighted average number of units outstanding. Management believes that FFO per unit is a useful measure of operating performance similar to FFO.

Adjusted Funds From Operations (AFFO) is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. It is an industry term used to help evaluate dividend or distribution capacity. The Trust does not calculate AFFO in accordance with the REALpac publications. AFFO primarily adjusts FFO (as calculated by Canadian Net) for capital expenditures that preserve the existing rental stream and straight-line rent. Most of these expenditures would normally be considered investing activities in the statement of cash flows. Capital expenditures, which generate a new investment or revenue stream, such as the development of a new property or redevelopment of an existing property, would not be included in determining AFFO. FFO may also be adjusted for non-recurring costs that impact operating cash flow.

The Trust considers AFFO to be a useful measure of recurring economic earnings and relevant in understanding its ability to service its debt, fund capital expenditures and provide distributions to unitholders.

AFFO is reconciled to net income and comprehensive income, which is the most directly comparable IFRS measure (refer to the *Adjusted Funds From Operations* section).

AFFO per unit is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. Canadian Net calculates AFFO per unit as AFFO divided by the weighted average number of units outstanding. The Trust believes that AFFO per unit is a useful measure of operating performance similar to AFFO.

Net Operating Income (NOI) is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. NOI is an industry term in widespread use and is defined as total revenues less total operating expenses as shown in the consolidated statements of income and comprehensive income (property revenues less total property operating costs such as property taxes, utilities and insurance). The Trust includes NOI as a non-IFRS measure in its consolidated statement of income and comprehensive income.

The Trust considers NOI a meaningful additional measure of operating performance of property assets, prior to financing considerations.

NOI is reconciled to Rental income from investment properties, which is the most directly comparable IFRS measure (refer to the *Results of Operations* section).

Earnings Before Interest, Taxes, Depreciation, and Amortization (EBITDA) is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. EBITDA is defined as profit before net interest expense, accretion of lease payments, income tax expense and other financial charges because these items are non-operating in nature.

EBITDA is used in calculations that measure the Trust's ability to service debt.

EBITDA is reconciled to net income and comprehensive income, which is the most directly comparable IFRS measure (refer to the *Earnings Before Interest, Taxes, Depreciation And Amortization* section).

Adjusted EBITDA is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. Adjusted EBITDA primarily adjusts EBITDA for change in fair value of investment properties, change in fair value of investment properties in joint ventures, change in fair value of convertible debentures, and change in fair value of warrants. The purpose is to allow the Trust to demonstrate how it services its debt by excluding the impacts of fair market gains and losses, which are volatile and have no impact on cash, and certain non-recurring items.

Adjusted EBITDA is used by the Trust to monitor its ability to satisfy and service its debt and to monitor requirements imposed by the Trust's lenders. Specifically, Adjusted EBITDA is used to monitor the Canadian Net's Interest Coverage Ratio based on adjusted EBITDA and Debt Service Coverage Ratio based on adjusted EBITDA.

Adjusted EBITDA is reconciled to net income and comprehensive income, which is the most directly comparable IFRS measure (refer to *Earnings Before Interest, Taxes, Depreciation And Amortization* section).

Adjusted Investment Properties is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. Adjusted Investment Properties is defined as investment properties plus the Trust's proportionate share of developed properties and properties under development owned through joint ventures.

The Trust enters into joint arrangements via jointly controlled entities and/or through co-ownerships and accounts for its interest using the equity method of accounting. Accordingly, the Trust's share of investment properties held through these joint ventures are presented under investment in joint ventures on the balance sheet and not as part of investment properties. As such, the Trust believes that Adjusted Investment Properties is a useful measure as it provides a more accurate picture of the entire value of the Trust's portfolio.

Adjusted Investment Properties is reconciled to Investment Properties, which is the most directly comparable IFRS measure (refer to *Adjusted Investment Properties* section).

Distributable Income is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. Distributable income is defined as FFO adjusted for accretion of lease payments, straight line rent, distributions from joint ventures, periodic mortgage principal repayments and repayment of long-term debt. The Trust adjusts for these items because it provides a better picture of its distribution capacity and adjusts for other items that affect cash.

The Trust believes distributable income is useful to investors because it is an important measure of the Trust's distribution capacity.

Distributable income is reconciled to FFO and Cash flow from operating activities, which is the most directly comparable IFRS measure (refer to *Distributable Income and Distributions* section).

Distribution as % of FFO is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. It is calculated by dividing the per unit distribution of the period by the FFO per unit of the period.

It is a ratio which measures the sustainability of the Trust's distribution payout. Management believes this IFRS ratio is useful to investors since it provides transparency on performance and the overall management of the existing portfolio.

The Trust considers this non-IFRS ratio to be an important measure of the Trust's distribution capacity.

Distribution as % of AFFO is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. It is calculated by dividing the per unit distribution of the period by the AFFO per unit of the period.

It is a ratio which measures the sustainability of the Trust's distribution payout. Management believes this IFRS ratio is useful to investors since it provides transparency on performance and the overall management of the existing portfolio.

The Trust considers this non-IFRS ratio to be an important measure of the Trust's distribution capacity.

The Debt Service Coverage Ratio based on Adjusted EBITDA is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. It is determined by the Trust as Adjusted EBITDA divided by the debt service requirements for the period, whereby the debt service requirements reflect principal repayments and interest expenses during the period. Payments related to prepayment penalties or payments upon discharge of a mortgage are excluded from the calculation.

The Debt Service Coverage Ratio is a useful measure and is used by the Trust's management to monitor the Trust's ability to meet annual interest and principal payments.

The Interest Coverage Ratio based on Adjusted EBITDA is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. The Trust calculates its Interest Coverage Ratio by dividing Adjusted EBITDA by the Trust's interest obligations for the period.

It is used by management in determining the Trust's ability to service the interest requirements of its outstanding debt.

The Debt to Total Assets Ratio is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. It is determined by the Trust as the sum of mortgages, long-term debt, current portion of mortgages and long term debt, balance owing on credit facilities and convertible debentures divided by the total assets of the Trust.

Management uses this ratio to evaluate the leverage of the Trust and the strength of its equity position.

The Debt to Total Assets Ratio – Excluding Convertible Debentures is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. It is determined by the Trust as the sum of mortgages, long-term debt, balance owing on credit facilities divided by the total assets of the Trust.

Management uses this ratio to evaluate the leverage of the Trust and the strength of its equity position assuming all convertible debentures were converted into units of the Trust.

FFO, FFO per unit, AFFO, AFFO per unit, NOI, EBITDA, Adjusted EBITDA, Adjusted Investment Properties, Distributable Income, Distributions as % of FFO, Distributions as % of AFFO, the Debt Service Coverage Ratio based on Adjusted EBITDA, the Interest Coverage Ratio based on Adjusted EBITDA, the Debt to Total Assets Ratio and the Debt to Total Asset Ratio – Excluding Convertible Debentures are not defined by IFRS, and therefore should not be considered as alternatives to profit or net income calculated in accordance with IFRS.

DESCRIPTION OF THE ISSUER'S BUSINESS

Canadian Net is an active Trust operating in the Canadian commercial real estate market. The Trust currently trades on the TSX Venture using the ticker symbol NET.UN. The Trust owns and rents commercial real estate properties directly, through its wholly owned subsidiaries and joint ventures.

Prior to June 17, 2021, the Trust operated under the name of Fronsac Real Estate Investment Trust and ticker "FRO.UN".

The principal, registered and head office of the Trust is located at 106 Gun Avenue, Pointe Claire, QC, H9R 3X3.

On November 10, 2021, the Trust completed a consolidation of units on a basis of one (1) post-consolidation unit for every ten (10) pre-consolidation units. All per unit numbers in this MD&A are shown on a post-consolidation basis.

As at March 31, 2022 the Trust held 95 investment properties, 79 residing in the province of Quebec, 9 in the province of Ontario and 7 in the province of Nova Scotia. The properties are occupied by 4 distinct groups of tenants composed of: (1) retailers, (2) national service-station and convenience store chains, (3) quick service restaurant chains, and (4) others.

The quality of the properties in the portfolio allow Canadian Net to maintain a best in class occupancy level. As at March 31, 2022, the Trust's occupancy was at 99%.

The Trust management is entirely internalized and no service agreements or asset management agreements are in force between Canadian Net and its officers. The Trust therefore ensures that the interests of management and of its employees are aligned with those of the unitholders.

These properties are leased to tenants on a management free basis with triple net leases. Under this type of arrangement, the tenant is responsible for paying real estate taxes, insurance and any general maintenance required, in addition to the base rent already stipulated in the lease terms. These types of leases ensure stable recurring cash flows with an opportunity for growth.

¹ This is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. Refer to section "Non-IFRS financial measures"

MAJOR EVENTS OF THE QUARTER

On February 1st, 2022, the Trust announced the acquisition of a 29,904 square-foot retail property in Verchères, Qc. The property is leased to a Metro grocery store, a Brunet pharmacy, and to a National Bank of Canada branch. Total consideration paid was \$6,500,000 (excluding transaction costs) and was settled in cash.

On February 2nd, 2022, the Trust filed a preliminary short form base shelf prospectus with the securities regulatory authorities in each of the provinces of Canada. Once a receipt for the final short form base shelf prospectus (the "Shelf Prospectus") has been obtained from the applicable Canadian securities regulatory authorities, this will enable Canadian Net to offer for sale and issue up to \$125 million of (i) trust units of the Trust (the "Trust Units"), (ii) subscription receipts of the Trust (the "Subscription Receipts"), (iii) unsecured debt securities of the Trust (the "Debt Securities"), (iv) warrants exercisable to acquire Trust Units and/or other securities of the Trust (the "Warrants") and (v) units comprising a combination of more than one of Trust Units, Subscription Receipts, Warrants or Debt Securities (the "Units", and collectively with the Trust Units, the Subscription Receipts, the Debt Securities and the Warrants, the "Securities") from time to time during the 25-month period during which the Shelf Prospectus remains valid. The specific variable terms of any offering of Trust Units, Subscription Receipts, Debt Securities, Warrants or Units will be set forth in one or more prospectus supplements.

On February 10th, 2022, the Trust filed and obtained a receipt for a final short form base shelf prospectus.

On March 21st, 2022, Canadian Net announced the acquisition of two properties located on Mellon Boulevard in the Jonquière sector of Saguenay, Qc. The first one is occupied by a grocery store operated under the IGA banner. The second one is occupied by a National Bank of Canada branch. Total consideration paid was \$8,800,000 (excluding transaction costs) and was settled in cash.

OUTLOOK 2022 & SUBSEQUENT EVENTS

Canadian Net is constantly looking for acquisitions of commercial real estate properties that have triple net leases and are management free. These types of acquisitions limit the overhead required to run the business and in turn allow management to focus on adding value through strategic acquisitions that are accretive to the Trust's FFO and AFFO per unit¹.

Canadian Net is looking for acquisitions that will sustain its growth. The Trust's capital and debt structure puts it in a selective position for other potential acquisitions.

On April 14, 2022, the Trust announced a new equity incentive plan (the "Equity Incentive Plan") that further aligns executive management and unitholder interests.

At the annual and special meeting of unitholders to be held on May 25th, 2022, unitholders will be asked, among other matters, to consider, and if deemed appropriate, to pass resolutions approving the Equity Incentive Plan as further described in the Management Information Circular. The Equity Incentive Plan consolidates, amends, and restates the existing unit compensation plan of the Trust, as approved on April 19, 2019, as amended on May 22, 2020, and as further amended on March 26, 2021, and the deferred trust unit plan of the Trust, as approved on March 26, 2021.

Those eligible to participate in the Equity Incentive Plan include trustees, officers, and employees (or any similar positions) of the Trust or any subsidiary of the Trust.

The Equity Incentive Plan provides for awards of compensation units, performance units, restricted units and deferred units as further described in the Management Information Circular.

The maximum number of units reserved for issuance at any time under the Equity Incentive Plan and any other security-based compensation plan of the Trust shall be 1,024,615. Any unit issued under the Equity Incentive Plan shall reduce the number of units reserved for issuance thereunder accordingly.

¹ This is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. Refer to section "Non-IFRS financial measures"

Canadian Net Real Estate Investment Trust

The Equity Incentive Plan is an “evergreen” plan. If and to the extent a performance unit, restricted unit or deferred unit is canceled or forfeited for any reason, the associated units subject to that performance unit, restricted unit or deferred unit will again become available for grant under the Equity Incentive Plan.

The Equity Incentive Plan remains subject to the approval of the TSX Venture Exchange and disinterested unitholder approval.

For more details regarding the Equity Incentive Plan, please refer to the Management Information Circular for the year ended December 31, 2021, and available on Canadian Net’s website and on SEDAR.

On May 24, 2022, the Trust announced the acquisition of four properties in Nova Scotia and Quebec. Total consideration paid was \$18,800,000 (excluding transaction costs) and was settled in cash. The purchase price represents a capitalization rate of approximately 6.5% for the portfolio.

The acquisitions are as follows:

- The first acquisition is a 30,500 square foot retail store operated under the Giant Tiger banner in Truro, Nova Scotia, which closed on May 19, 2022.
- The second acquisition is a 29,698 square foot grocery store operated under the Metro banner located in Chénéville, Québec, which closed on May 24, 2022.
- The third acquisition is a 35,991 square foot grocery-anchored retail strip located in St-André-Avellin, Québec, which closed on May 24, 2022.
- The fourth property is a 3,500 square foot service-station operated under the Couche-Tard banner in St-Jérôme, Québec, which closed on May 24, 2022.

The outbreak of COVID-19 has resulted in the federal and provincial governments enacting numerous measures such as the implementation of a travel ban, self-imposed quarantine periods and social distancing. These measures have caused material disruption to businesses and has resulted in an economic slowdown. These measures have also resulted in material disruptions to global equity and capital markets.

Canadian Net’s portfolio is mostly comprised of retailers who provide essential services, such as grocery stores and pharmacies, service stations and quick-service restaurants. As of today, the Trust’s portfolio is comprised of 99 properties with more than 100 tenants. Throughout the COVID-19 crisis, our tenants have remained open to continue to provide these essential services to the communities in which they operate, with some exceptions. Depending on the type of tenant, some have experienced increased traffic, while others have been more susceptible to the government stay at home initiatives.

It is not possible to forecast with certainty the duration and full scope of the economic impact of COVID-19 and accordingly certain aspects of the Trust’s operations could be affected, including rent collection, occupancy rates, demand for retail space, capitalization rates, and the resulting value of the Trust’s properties. The full extent and duration of COVID-19 remain uncertain at this time.

The Trust believes in a long-term growth strategy through acquiring properties that will increase its funds from operations per unit³, distributions per unit¹ and as a result increase total unitholders value.

The Trust's rental income revenues are used to pay down various working capital obligations. These funds are the primary source to fund mortgage/loan and other debt payments, with the residual used to fund distributions to unit holders.

For the 3-month period ended March 31, 2022, Canadian Net has increased its cash from operating activities. These were mostly impacted by the growth in rental revenues, which was partially offset by the increase in financial expenses related to mortgages on new acquisitions.

Cash spent on investing activities can mainly be attributed to the acquisitions of properties and participations in joint ventures that took place over the course of the period. For more details regarding these acquisitions over the 3-month period ended March 31, 2022, please refer to Note 3 "Investment Properties" and Note 4 "Joint Arrangements" in the Financial Statements.

For the 3-month period ended March 31, 2022, Canadian Net increased its cash derived from financing activities. These amounts are the result of the money raised through new mortgages used to fund our acquisitions.

The Trust expects to be able to meet all of its obligations as they become due in the short-term and the long-term. Canadian Net expects to have sufficient liquidity as a result of cash on hand, cash flow from operating activities, operating facilities, the ability to refinance properties when required as well as the ability to raise equity and debt in the capital markets when deemed necessary.

Financial position & COVID-19

Canadian Net benefits from a solid financial position. The Trust has sufficient liquidity, including cash on hand and undrawn credit facilities, to meet its current obligations, working capital requirements and distributions. As of March 31, 2022, Canadian Net had approximately \$12,750,000 of cash and availability on its credit facilities.

RESULTS OF OPERATIONS FOR THE QUARTER ENDED MARCH 31, 2022

For the quarter ended March 31, 2022, the Trust had rental income of \$5,431,695 (\$4,453,791 in Q1 2021). This increase in rental income is due to the addition of new properties and the increases in rent of certain existing properties. These rents are composed primarily of fixed monthly rents as well as variable rents based on gross sales for certain tenants.

The change in fair value of investment properties is based on the change in capitalization rates applied to each property's adjusted net operating income as well as post-acquisition adjustments (see *Significant Accounting Policies and Estimates* section for more details). As at March 31, 2022, the Trust has estimated that a 0.25% decrease in the capitalization rate applied to the overall portfolio would increase the fair value of the investment properties by approximately \$11,241,081 (\$7,499,790 in Q1 2021) while an increase in the capitalization rate would decrease the fair value of the investment properties by approximately \$11,218,865 (\$6,940,275 in Q1 2021). The weighted average capitalization rate used in the calculation of the fair value of investment property is 6.02% (6.53% in Q1 2021) while the range of capitalization rates used is 4.75% to 6.75% (5.50% to 7.25% in Q1 2021). The capitalization rates used in the calculation of the change in fair value of investment properties are provided by a third-party firm specializing in the appraisal of commercial properties. The adjusted rental income is adjusted to take into consideration provision for vacancies, administrative fees, structural reserves and discounts on variable income.

The Trust's main operating expenses were financial in nature and were almost entirely made up of interest on mortgages, bank loans, and convertible debentures, which amounted to \$1,668,936 in Q1 2022 compared to \$298,748 for the same period last year. For the quarter ended March 31, 2022, the change in fair value of convertible debentures and warrants increased financial expenses by \$339,006 compared to a decrease of \$713,377 in 2021. Excluding this change in fair value, financial expenses for the quarter ended March 31, 2022 were \$1,329,930 compared to \$1,012,125 in 2021. This increase in financial expenses is because of an increase in interest expense, which is due to the increase in the number of mortgages.

For the quarter ended March 31, 2022, the Trust recorded FFO¹ of \$3,070,278 in comparison to \$2,433,267 in Q1 2021. FFO per unit¹ increased by 8% from \$0.140 to \$0.151 for the same period last year. The growth in FFO¹ is mainly derived from rental revenues of newly acquired properties net of the increase in financial expenses related to new mortgages on the properties.

¹ This is a non-IFRS financial measure that does not have any standardized IFRS meaning and as such may not be comparable to other issuers. Refer to section "Non-IFRS financial measures"

CAPITAL STRUCTURE

The real estate business requires capital in order to continue to fund acquisitions, which is a key part to growth and success. The Trust is authorized to issue an unlimited number of trust units. During the 3-month period ended March 31, 2022, the Trust issued units as follows:

On February 28th, 2022, the Trust announced the issuance of 48,100 units of the Trust at a price of \$7.71 per unit, which equates to \$370,851 as partial compensation for the services rendered by certain members of management and the board of trustees during the fiscal year ended on December 31st, 2021. Of those 48,100 units, 29,750 units have been issued as Deferred Trust Units.

TRUST UNITS

Units issued (redeemed):	# of units	
Units as at January 1, 2021	17,399,257	
February 15, 2021 (units for services)	43,200	
April 1, 2021 (warrants)	2,551	
April 30, 2021 (warrants)	10,204	
May 17, 2021 (warrants)	22,500

Units as at March 31, 2022	20,487,178	
Potential dilutive impact of financial instruments as at March 31, 2022		Exercise price
Warrants outstanding	153,170	\$6.10 per unit
Options outstanding	10,000	\$3.80 per unit
Deferred Trust Units	29,750	N/A
Conversion of convertible debentures (in units)	1,167,596	\$7.30 to \$8.13 per unit

Warrants

The Trust had 347,396 warrants outstanding at the beginning of the period. During the 3-month period ended March 31, 2022, 194,226 warrants were exercised. The total number of warrants outstanding as of March 31, 2022 is of 153,170.

The warrants' expiry date was May 16th, 2022 and as of May 25th, 2022 there are no more warrants outstanding.

Convertible debentures

The nominal value of convertible debentures outstanding as of March 31, 2022 is of \$9,136,000 and their conversion price range from \$7.30 to \$8.13 per unit. There was no conversion over the 3-month period ended March 31, 2022.

Options

Over the 3-month period ended March 31, 2022, no options were exercised. The total number of options outstanding as of March 31, 2022 is 10,000 with an exercise price of \$3.80.

The total number of units outstanding as at March 31, 2022 was 20,487,178. Since March 31, 2022, the Trust issued a total of 105,555 units, bringing the total number of units outstanding as at May 25, 2022 to 20,592,733.

MORTGAGE BALANCES DUE AT MATURITY (in \$M)

Debts are composed of mortgages, loans, convertible debentures and secured credit facilities. As at March 31, 2022, there are 36 mortgages (excluding Canadian Net's interest in mortgages held through joint ventures) with Canadian financial institutions with a total carrying value of \$143,017,962 (\$133,330,859 at December 31, 2021). These mortgages require the Trust to make principal payments of \$46,942,480 over the next 5 year and \$96,075,482 thereafter. The mortgages outstanding currently have an average term to maturity of 5.8 years (6.0 years at December 31, 2021). Convertible debentures in circulation as at March 31, 2022 have a carrying value of \$8,332,811 (\$8,416,510 at December 31, 2021). The Trust currently has 3 secured lines of credit with authorized limits of \$10,570,000, \$6,000,000 and \$1,200,000. These lines of credit have a balance of \$6,115,000 as at March 31, 2022 (\$2,885,000 at December 31, 2021).

Management believes that Canadian Net's blend of debt and equity in its capital base provides stability and reduces risk, while generating an acceptable return on investment. This compliments the long-term business strategy of the Trust, which is to grow its presence in the commercial real estate market in Canada.

SIGNIFICANT ACCOUNTING POLICIES AND ESTIMATES

The preparation of the Trust's consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of certain assets and liabilities at the reporting date and the reported amounts of revenues and expenses during the reporting period. The significant estimates and judgments include assessing the nature of an acquisition and whether it represents a business combination or an acquisition of assets and liabilities, whether a joint arrangement structured through a separate vehicle is a joint operation or a joint venture, the assessment of the fair values of investment properties and the assessment of the unit-based compensation and derivative financial instruments where the fair value cannot be derived from active markets.

One significant judgment and key estimate that affects the reported amounts of assets at the date of the consolidated financial statements and the reported amounts of profit or loss during the period, relates to property valuations. Investment properties, which are carried on the consolidated statements of financial position at fair value, are valued by the Trust. The valuation of investment properties is one of the principal estimates and uncertainties of these financial statements. The valuations are based on a number of assumptions, such as appropriate discount rates and capitalization rates and estimates of future rental income, operating expenses and capital expenditures. These investment properties are sensitive to fluctuations in capitalization and discount rates. Investment properties are appraised primarily based on adjusted cash flows obtained from existing tenants, since market participants focus more on expected income. The fair value of investment properties indicated in the consolidated financial statements has been calculated internally using the direct capitalization method based on rental income. This fair value has been calculated by using a capitalization rate, provided by qualified independent professional appraisers, and applied on adjusted rental income. Rental income is adjusted to take into consideration provision for vacancies, administrative

fees, structural reserves and discounts on variable income. Inputs used in determining the fair value of investment properties have been considered in order to reflect the Trust's best estimates of the impacts related to COVID-19 based on information available to the Trust as of March 31, 2022.

RISKS AND UNCERTAINTIES

All property investments are subject to a degree of risk and uncertainty. Property investments are affected by various factors including general economic conditions and local market circumstances. Local business conditions such as oversupply of space or a reduction in demand for space particularly affect property investments. As at March 31, 2022 the Trust held interests in 95 properties in Quebec, Ontario and Nova Scotia, across 4 market segments. The Trust is exposed to credit risk, interest rate risk and liquidity risk. In order to limit the effects of changes in interest rates on its expenses and cash flows, the Trust constantly follows the evolution of the market interest rate risk and consequently determines the composition of its debts.

Credit Risk

Credit risk comes primarily from the potential inability of customers to discharge their rental obligations. Canadian Net strives to obtain rent payments on a monthly basis in order to limit this risk while maintaining a limited receivable balance (\$719,150 as at March 31, 2022 compared to \$1,018,030 as at December 31, 2021). The composition of this balance mostly includes major Canadian companies with small credit risk.

The Trust has a portfolio of loans receivable from joint venture partners. These loans are secured by interests in said joint ventures. As at March 31, 2022, loans receivable amount to \$5,180,631 (\$4,573,998 as at December 31, 2021).

Interest Rate Risk

Interest rate risk affects the Trust through its loans receivable, mortgages, long-term debt, and convertible debentures. These instruments bear fixed interest rates and as such expose the Trust to fair value risk. Lines of credit with a floating interest rate expose the Trust to a cash flow risk. If market conditions warrant, the Trust may attempt to renegotiate its existing debt to take advantage of lower interest rates. The Trust has an ongoing requirement to access debt makers and there is a risk that lenders will not refinance such maturing debt on terms and conditions acceptable to the Trust or on any terms at all. Each change of 1% of the interest rates would have an impact of \$363,226 on the financial expenses for the period.

Liquidity Risk

Liquidity risk is the risk of being unable to honour financial commitments by the deadlines set out under the terms of such commitments. Senior management manages the Trust's cash resources with respect to financial forecasts and anticipated cash flows.

The Trust has cash availability which allows it to control its current liquidity risks, mainly composed of accounts payable, current portion of mortgages and long-term debt.

Lease Roll-over Risk

Lease roll-over risk arises from the possibility that Canadian Net may experience difficulty renewing leases as they expire or in re-leasing space vacated by tenants. Canadian Net's principal management of occupancy risk is the skewing of tenancies towards national tenants, the signing of longer term leases and significant pre-leasing of development space.

Development and Acquisition Risk

The Trust's external growth prospects will depend in large part on identifying suitable acquisition opportunities and conducting necessary due diligence. If the Trust is unable to manage its growth and integrate its acquisitions and developments effectively, its business operating results and financial condition could be adversely affected. Developments and acquisitions may not meet operational or financial expectations due to unexpected costs or market conditions, which could impact the Trust's performance.

Environmental Risk

Canadian Net is subject to various laws relating to the environment which deal primarily with the costs of removal and remediation of hazardous substances such as petroleum products. Environmental risk is relevant to Canadian Net's ability to sell or finance affected assets and could potentially result in liabilities for the costs of removal and remediation of hazardous substances or claims against Canadian Net. Management is not aware of any material non-compliance with environmental laws or regulations with regard to Canadian Net's portfolio, or of any material pending or threatened

actions, investigations or claims against Canadian Net relating to environmental matters. Canadian Net manages environmental exposures in a proactive manner by conducting thorough due diligence before the acquisition of each property and by taking environmental insurance coverage on properties that where risk could potentially arise.

Status of the REIT

The Trust is required to comply with specific restrictions regarding its activities and the investments held by it in order to maintain its real estate investment trust status ("REIT"). Should the Trust cease to qualify as a REIT, the consequences could be material and adverse. As well, the Trust conducts its affairs in order to qualify as a REIT under applicable tax statutes so that it retains its status as a flowthrough vehicle for the particular year. Should the Trust not meet the conditions to qualify as a REIT in a particular year, it may be subject to tax similar to a corporation, which may have an adverse impact on it and its unitholders, on the value of the units and on its ability to undertake financings and acquisitions. This could also materially reduce its distributable cash. Management believes that it complies with the REIT rules.

Access to Capital

The Trust's growth prospects depends on its ability to access capital, mainly debt and equity. Adverse market conditions could lead to a negative capital markets environment in which the Trust might not be able to issue units, debentures or any other financial instruments in order to raise capital. Access to debt, mainly through mortgages, is also crucial for financing purposes, and the unavailability of the debt market would make it harder for Canadian Net to acquire real estate assets that satisfy its investment criteria.

COVID-19 Risk

A local, regional, national or international outbreak of a contagious disease, such as COVID-19, could have an adverse effect on local economies and potentially the global economy. The COVID-19 could affect the Trust's ability to collect rent in certain instances.

Management continues to assess the impact of COVID-19 and governments' responses to it on the Trust. Portions of the Trust's financial results incorporate estimates from management that are subject to increased uncertainty due to the market disruptions caused by the COVID-19 pandemic. Areas of increased estimation uncertainty in the Trust's consolidated financial statements include the fair value of its investment properties and the recoverability of amounts receivable.

RELATED PARTY TRANSACTIONS

The loans receivable include an amount of \$210,000 (2021: \$210,000) due from officers of the Trust. The loans were granted for a term of 5 years, and bears interest at a rate of prime plus 0.75% per annum. Interest income on the loans amount to \$1,689 (2021: \$1,184) for which no amount is receivable as at March 31, 2022 (2021: \$0).

During the period ended March 31, 2022, certain trustees of the Trust exercised 30,612 warrants at an exercise price of \$6.10 per unit for aggregate gross proceeds of \$186,733.

On August 3, 2021, the Trust closed its public offering of trust units of the Trust. Certain trustees of the Trust acquired an aggregate of 50,750 units under the offering, for aggregate gross proceeds of \$378,087.

During the year ended December 31, 2021, \$5,000,000 of advances were made by certain trustees in order to facilitate an acquisition. The advances were repaid within the year and \$20,000 of financing fees were paid to the same trustees.

All Related party transactions were made on terms equivalent to those that prevail in arm's length transactions.

Officers and Trustees Compensation

Key management personnel are those individuals having authority and responsibility for planning, directing and controlling the activities of the Trust, directly or indirectly. Key management personnel are comprised of the Company's executive officers and Trustees and their compensation is as follows:

Period endend March 31	2022	2021
Salaries and benefits	109,399	76,367
Unit-based compensation	370,851	244,640
Total	480,250	321,007
